

Kids need  
"some" adversity

Psychology  
of  
Growth

When do you move  
from nurturing (licking  
+ grooming) to  
letting children  
fail + grow?

Challenge +  
failed playing  
chess

Thank you for joining us in our shared quest to make  
our community a place where all children can succeed.

1. Early childhood
  2. Adolescence
- two primary  
developmental stages

Biology  
of  
Stress

Inhibits  
sense of  
growth  
potential  
(fixed)

Stress ≠  
challenge

(toxic stress)

"secure  
attachment"  
is the antidote

SABOT  
STONY  
POINT

Progressive education for  
preschool through 8th grade
